Human Genetics

Human Genetics was founded in 1964 and published up to Vol. 30 as Humangenetik — Human Genetics — Génétique humaine

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-6717, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Abbreviations in parenthesis refer to the following sections: (E) Editorial; (R) Review article; (O) Original investigation; (SC) Short communication; (CC) Clinical case report; (CO) Case observed; (RG) Rare genetic variant register; (DV) DNA variants; (L) Letter to the editors

Abbas NE, Toublanc JE, Boucekkine C, Toublanc M, Affara NA, Job J-C, Fellous M: A possible common origin of "Y-negative" human XX males and XX true hermaphrodites (O) 356
Abrisqueta JA → Pimentel D
Adham IM, Grzeschik K-H, Geurts van Kessel AHM, Engel W: The gene encoding the human preproacrosin (ACR) maps to the q13–qter region on chromosome 22 (O) 59
Adham IM, Klemm U, Maier W-M, Engel W: Molecular cloning of human preproacrosin cDNA (O) 125
Adolph S → Kunze N
Affara NA → Abbas NE
Affara NA → Ferguson-Smith MA
Agaoglu L → Aulehla-Scholz C
Akaoka I → Fujimori S
Alcaide-Loridan C → Le Coniat M
Alonso P → Pimentel D
Al-Sedairy S → Waghray M
Antonarakis SE → Inaba H
Antonarakis SE → Ladias JAA
Antonelli M → Ferrari M
Anvret M → Lee J-S
Anvret M → Nordenskjöld M
Arcasoy A → Aulehla-Scholz C
Arnemann J → Jakubiczka S
Arveiler B → Guioli S
Aschendorff A → Tümmler B
Atkinson MD → Heslop-Harrison JS
Aulehla-Scholz C, Basaran S, Agaoglu L, Arcasoy A, Holzgreve W, Miny P, Ridolfi F, Horst J: Molecular basis of β-thalassemia in Turkey: detection of rare mutations by direct sequencing (O) 195
Aulehla-Scholz C → Dworniczak B
Aulehla-Scholz C → Schnee J

Bach FH → Dahl CA
Balassopoulou A → Serre JL
Bald R → Schwanitz G
Balestreri R → Daga A
Ballabio A, Ranier JE, Chamberlain JS, Zollo M, Caskey CT: Screening for steroid sulfatase (STS) gene deletions by multiplex DNA amplification (SC) 571
Ballesta F → Templado C
Bamforth FJ → Graham A
Barbujani G → Clementi M
Barbujani G, Russo A, Danieli GA, Spiegler AWJ, Borkowska J, Hausmanova Petrusewicz I: Segregation analysis of 1885 DMD families: significant departure from the expected proportion of sporadic cases (O) 522
Bardoni B → Caiulo A
Bardoni B → Guioli S
Barrios L → Fuster C
Barrios L → Genescà A
Basaran S → Aulehla-Scholz C
Bates G → Ivens A
Bates G → Scambler PJ
Baumann P → Tomei L
Bech-Hansen NT, Field LL, Schramm AM, Reedyk M, Craig IW, Fraser NJ, Pearce WG: A locus for X-linked congenital stationary night blindness is located on the proximal portion of the short arm of the X chromosome (O) 406
Bellini F → Ferrari M
Benabadji M → Nafa K
Benet J → Genescà A
Benet J → Templado C
Benitez J → Fernández E
Bennekom CA van → Zandvoort PM van
Bennett MD → Heslop-Harrison JS
Berg-de Ruiter E van den, Jong B de, Mulder NH, Meerman GJ te, Schraffordt Koops H, Sleijfer DT: Chromosomal damage in peripheral blood lymphocytes of patients treated for testicular cancer (O) 191
